

In lieu of the international scientist's appeal to the UN on taking precautionary measures with regard to wireless communications of all kind, it is not in the interest of the public health that global WiFi deployed from space be implemented at this time. See well over 6,000 scientific studies on EMR in the bibliography kept since 1971 by Dr. Zory Glazer who was hired by the US Navy to study health effects of EMR (Electromagnetic Radiation). I have personally suffered from non-ionizing EM Radiation and nearly died 3 times at a weight of 77 lbs. I know thousands of others like myself that have been exiled from modern society and its conveniences due to illness from exposure to the current levels of EMR. Some have even died, suffering complications that have hidden the nature of the disease process. Even the former head of the World Health Org and former Prime Minister of Norway, Dr. Gro Brundtland has suffered from microwave illness. At the current levels, many scientists have realized now that non-ionizing radiation is no longer safe. The US Gov NTP study which recently came out shows definite cancer links between cell phone use (and other wireless devices) I urge you to take this matter seriously for the health of all, but especially for those that are already disabled and suffering.
